

# ROYAL CANIN Veterinary Diet™ canine TREATS

## Product Description:

ROYAL CANIN Veterinary Diet™ canine TREATS are designed as a palatable reward for good behavior and to enhance the bond between the dog and the owner. The treats are low in calories, fat, phosphorus and sodium, as well as specifically designed as treats for dogs with health concerns, including obesity, heart disease, renal disease and gastrointestinal disease.

## Nutrition Statement:

ROYAL CANIN Veterinary Diet™ canine TREATS are intended for intermittent or supplemental feeding only.

## Indications:

- Healthy adult and mature dogs
- For dogs with
  - Heart disease
  - Kidney disease
  - Diabetes mellitus
  - Liver disease
  - Gastrointestinal disease

## Contraindications:

- Food hypersensitivity to oats, carrots, apples or tomatoes

## Nutritional Differences: (as compared to typical commercial pet foods)

- Low in fat
- Restricted in energy
- Controlled levels of phosphorus
- Low in sodium
- Supplemental levels of omega fatty acids for a healthy skin and hair coat
- Enriched with antioxidants

## Feeding Guide:

- Treats should not exceed 10% of the total daily caloric intake.

### Low Phosphorus:

A restricted phosphorus intake is essential to slow the development of renal secondary hyperparathyroidism.

### Low Sodium:

Low levels of sodium to help minimize the clinical signs associated with heart failure.

### Calorie Control:

Low fat level and controlled level of calories to restrict energy intake.

### Natural Preservative:

Naturally preserved with mixed tocopherols, rosemary extract, and citric acid.

## Ingredients:

### ROYAL CANIN Veterinary Diet™ canine TREATS
