Back: Measure length of pet's back from the base of the neck to the base of the tail. See below for estimating by breed.

Neck: Measure neck circumference.

Chest/Girth: Measure girth around the broadest part of the chest.

Note: If the measurement is between sizes, we recommend going up one size. Also, if pet has a stout build, a deep chest, or is overweight, we recommend going up a minimum of one size for proper fit. If the dog is long-backed, like a Dachshund, a smaller size is recommended.
